Achieved 3rd place in a community-level drawing competition held on 21 February at Ambagagan Colony. Recognized for creativity, artistic skills, and visual presentation among multiple participants.

Publications

An Explainable Multi-Tier Fusion Stacking Framework for Multi-Class Psychological Distress Prediction

2026 International Conference on Innovations in Science, Engineering and Technology (Submitted – Under Review)

Co-authored a research paper presenting a Multi-Tier Fusion Stacking Architecture for multi-class severity prediction of depression, anxiety, and stress using the DASS-42 scale. The model combines gradient-boosting algorithms (XGBoost, LightGBM, CatBoost) with SVM, achieving up to 99.20% validation accuracy, with SHAP-based explainability integrated for interpretability.

Explainable Face Mask Detection Using CNN, MobileNetV2, and Ensemble Learning: A Comparative Study with Statistical Validation

Submitted (Under Review) – 2026 International Conference on Innovations in Science, Engineering and Technology

Co-authored a research paper comparing custom CNN, MobileNetV2 transfer learning, and ensemble models for explainable face mask detection, achieving up to 99% accuracy, with Grad-CAM interpretability and statistical validation using McNemar's test.
